Podcast	Web URL	Feed URL	Description
Career Opportunities: helping to build the career you deserve	http://welchwrite.com/career	http://feeds.feedburner.com/career?format=xml	These podcasts are produced two times each week. The author, Douglas Welch, offers audio and text files for each session. I especially like the daily career tips that are available in either text or video format. The tips are short, to the point, and common sense for students.
Digital Age Podcast	http://www.digitalage.org	http://www.npr.org/rss/podcast.php?id=510175	Digital Age is in its twelfth year. It covers politics, media and the way we live in the Digital Age. There are a variety of Pod topics, including Web 2.0, censorship, and cyber bullying. Key government players share their viewpoints. There are several pods that aren't necessarily on topic (digital age), but it seems worth it to check out the new additions.
This Week in Law	http://twit.tv/twil	http://leoville.tv/podcasts/twil.xml	Actual attorneys discuss breaking issues in technology law, including patents and copyrights, online bullying, blogger liability, e-commerce and the Internet, and more. Podcasts are released monthly, with the first episode produced in October 2006.
The Digital Story	http://www.thedigitalstory.com/blog	http://feeds.feedburner.com/TheDigitalStory	Published weekly, The Digital Story includes digital photography podcasts, photo tips, reader submitted pictures, hardware and software reviews, and more. The Digital Story is about making photography, music, and filmmaking enjoyable. Subscribing to this feed provides links to text, image, and audio files.
Web Axe - Practical Web Design Accessibility Tips - Podcast and Blog	http://webaxe.blogspot.com	http://feeds.feedburner.com/webaxe	Web Axe is a podcast and blog that provides practical web accessibility tips for programmers, coders, or anyone else interested in techniques for web accessibility (see WAI, Section 508, WebAIM). Includes links to supplementary resources too!

The first podcast would be a nice addition to my employability skills course. The daily tips are extremely short, and would serve as excellent discussion starters. The remaining four podcasts would compliment the curriculum in my web design courses. Several publications address non-technical topics related to using technology. I especially like the availability of "current events" material in this area.
